Light Weapons Infantryman lack heavy weapons and armor or with a reduced vehicle footprint / Light infantry units lack the greater firepower, operational mobility and protection of mechanized or armored units, but possess greater tactical mobility and the ability to execute missions in severely restrictive terrain and in areas where weather makes vehicular mobility difficult / Light infantry forces typically rely on their ability to operate under restrictive conditions, surprise, violence of action, training, stealth, field craft, and fitness levels of the individual soldiers to compensate for their reduced lethality / Despite the usage of the term "light", forces in a light unit must carry everything they require to fight, survive and win due to lack of vehicles
